WE ARE ACCEPTING NEW PATIENTS

*A number of our patients have been asking us if we are accepting new patients.
The answer is: Yes, all of our doctors are accepting new patients!*

Our mission is to provide patients with the quality vision care they deserve.
So please do not hesitate to refer your friends and family. We are here to help!

TIRED OF RED, IRRITATED, WATERY OR DRY EYES? DOES IT SOMETIMES FEEL LIKE THERE IS SAND IN YOUR EYES?

You are not alone. Your eyes could be irritated by a variety of different things, some of which include allergies, medication, auto immune disease, hormonal changes associated with aging, as well as working on the computer, smart phone or tablet for too long. Even your contact lens solution could be the culprit. But don't despair – we can help!

Whatever the cause---we have a variety of solutions available. Call today to schedule an appointment:

ARE YOU FINDING YOUR ARMS JUST AREN'T LONG ENOUGH ANYMORE? MULTIFOCAL CONTACT LENSES LET YOU SEE ALL DISTANCES

Is it getting difficult to read fine print or to see in low light? Have you begun moving your phone further away to find the “sweet spot” where you can see clearly? Are the words on a menu or newspaper not as clear as they should be? Then you might have presbyopia. It’s a completely normal part of the aging process in our eyes. Once you hit your 40s, everybody will experience it.

With multifocal contact lenses you’ll experience clear vision – near, intermediate, and far, in dim light and bright – so you can continue wearing contact lenses to do the things you love.

Let us know if you are experiencing any of the symptoms above. Multifocal contacts may be your best solution. Schedule an appointment today.

DESIGNER EYEWEAR TRUNK SHOW

new styles, prizes + perks, delicious treats

Don’t miss our Designer Eyewear Trunk Show for the latest in eyewear fashion, treats, giveaways, and more. Be one of the first 50 in the door and get a FREE gift.

6201 S. Minnesota Ave. | visions@sdvisions.com
(605) 274-6717 | sdvisions.com

Love what you see.

BACK IN SCHOOL REMINDER: DO YOU KNOW THE SIGNS?

With kids back in school, it’s time for parents of kids who struggle with reading and learning to take action.

Many eye coordination and eye movement disorders can easily be mistaken for attention problems and learning disabilities. Here is a checklist that shows you the signs that these correctable visual disorders could be at the root of your child’s struggles. The good news is that if you recognize any of these signs, we can help!

Blur when looking up close

Double vision

Headaches working up close

Words run together when reading

Burning, itchy, watery eyes

Falls asleep when reading

Sees worse at the end of the day

Skips/repeats lines when reading

Dizziness/nausea with near work

Tilts head/closes one eye when reading

Difficulty copying from chalkboard

Avoids near work/reading

Omits small words when reading

Writes uphill or downhill

Misaligns digits or columns of numbers

Poor reading comprehension

Poor/inconsistent in sports

Holds reading material too close

Trouble keeping attention on reading

To find out how vision problems can interfere with reading, comprehension and remembering what was read, please visit www.sdvisions.com.

To schedule your child’s appointment, call: 605-271-7100.
